

A SMARTER SOLUTION

# PuduBot1 1st Generation Delivery Robot

# What solutions does PuduBot1 provide?

- Repetitive table serving
- Table bussing tasks for multiple scenarios
- Best-selling commercial service robot
- Boosting efficiency
- Dual Solutions : Laser SLAM and Visual SLAM

## ADJUSTABLE TRAY

3\*metal trays of 42\*50cm

## INTERACTIVE LIGHT STRIP

Clearer operating instructions

## LIDAR

New generation radar  
Anti-sunlight Lidar for  
safer operation

## GLOBAL AUDIO

High-fidelity audio up to  
2\*10W More outstanding  
sound effects

## VISUAL POSITIONING

New visual solution  
More precise positioning

## ALL-ALUMINUM FRAME

Aviation-grade aluminum alloy  
More stable structure

## 3D OBSTACLE AVOIDANCE

Newly added 3D vision sensors  
Safer delivery

## NEW SUSPENSION

Easily dealing with various  
bumps on the road  
More stable operation

# Flexible Dish Cover

- Modular design
- Easy to install
- Contactless delivery
- Safer services

A SMARTER SOLUTION

# PUDU SLAM

PUDU SLAM is a new technology integrated SLAM solution based on Lidar, Camera, RGBD, IMU, Encoder and multiple sensors. This solution can ensure that the robot performs tasks more efficiently in a mixed environment

A SMARTER SOLUTION

# 3D OBSTACLE AVOIDANCE

Compared to traditional 2D radar, 3D stereo sensors can quickly stereo model the surrounding environment, which can greatly reduce the probability of security accidents.

### **Powerful, Smooth Control with Linkage Suspension**

Pudubot1 has 6 wheels with well-designed independent suspension linkage system. This allows Pudubot1 to dealing with various bumps on the floor, with smooth and stable movement.

### **Super-Easy to Operate**

Use-Friendly: With easy-to-use Graphic interface, PuduBot1 goes to work in just few taps on the screen. Multi-function and scenarios of operations for various types of users e.g. Direct & Multiple-delivery, Auto-Cruise mode, Happy Birthday.

### **Precise & Powerful Sensing**

PuduBot1 uses integrated data from multiple sensors: Lidar, vision camera with sensor pointing up, and 2 Intel RealSense Depth Cameras located in the lower part of the robot. This allows the robot to avoid collisions and adapt to the changing environment like in restaurants, which changing environments.

# ENVIRONMENTAL PERCEPTION

The safety and obstacle avoidance performance have been greatly improved, and the probability of touching suspended objects or other blind spot obstacles has been greatly reduced, in addition to Lidar, multiple visual sensors are added to enable the robot to upgrade from 2D plane perception to 3D environment detection of the whole body.

A SMARTER SOLUTION

# PUDU SCHEDULER

PUDU SCHEDULER has adopted a decentralized, flexible ad hoc network communication scheme and algorithm architecture. Each robot can directly communicate with any robot in the same network, and quickly calculate and make decisions. Such design reduces the requirements for the network, reduces a central computing node that requires high computing power, and is closer to the interaction mechanism among people.

A SMARTER SOLUTION

# PUDU CLOUD

PUDU CLOUD platform provides a powerful cloud intelligent service support for Pudu robots, enabling smart catering, with specific functions such as: business management platform, automated operation and maintenance platform, scenario data collection platform, and cloud intelligent service platform.

# Specification

## Machine Dimension

20.3" x 19.7" x 50.7"

## Machine Weight

77.1lb

## Maximum Loads

66lb

## Tray Size

16.5" x 20"

## No. of Trays

Default 3

## Delivery Modes

Delivery, birthday, cruise, and dish return modes

## Battery Duration

10-24h

## Charging Time

4h

## Min Passing Width

31.4"

## Cruise Speed

0.5m/s - 1.2m/s  
(Adjustable)

## Charging Method

Wire & Auto-charging

# Features

## All-inclusive Platform, Endless Capabilities

Support third-party development, customization and expansion

## Multi-Industry Linkage

Including management in manufacture, retail, hospital & clinic. as well as entertainment & leisure

## Outstanding Compatibilities

Support Type-C/4G/LoRa/Wi-Fi connection

## Fully Enclosed Machine Design

Effectively resist dust and water

## Simplified Deployment, Greater Adaptability

Marker-less deployment reduces 75% deployment time without redecoration of ceiling and comforts with reliable operation even in high ceiling environment

## Various Delivery Modes, Diverse Delivery Scenarios

Support four delivery modes and easy switching as required, deeply meet the delivery needs of different scenarios

The smart serving solution for a wide range of business

**FAST  
INSTALLATION**

Quick setup without the need to install separate ceiling markers.

**SLAM  
AUTONOMOUS DRIVING**

Built to navigate using the SLAM method that recognizes space with a 3D camera and LIDAR sensor.
